This will help to control the usage of internet.

➤ **Major Project**

Team size: Four

Project description: “Secure Graphical Authentication System using Watermark Embedding”

Language -:“Android”

Description:

Operating System-Android 5.6 and above

Secure Graphical Authentication System using Watermark Embedding system is a picture based authentication system. First selecting an image,from this image user has to select one image as password.The selected image is watermarked with cover image to avoid shoulder surfing attacks.During login,after entering user name,a QR code is generated in the computer.User has to scan the QR code using his mobile phone,and a collection of image will be appeared in the phone and user can login by choosing correct grid.

➤ **Seminar**

“Two level QR code for private message sharing and document authentication”

Two level QR code has two level public and private storage level.Public level is same as the standard QR code storage level,therefore it is readable for any classic QR code application.The private level is used for private message sharing and document authentication by replacing the black module of standard QR code by specific textured pattern.
